Continuation Sheet (PTO-303)

Application No.

The examiner has considered the amendments to the claims in the after final amendment dated 8/31/2009 and has determined that these amendments alter the scope of the claims as considered in the final rejection. Because the scope of the claim has been modified to include the new limitations of "optimizing the quality of the retinal image" and the method occurring "without the use of subjective refractions" it is therefore clear that these limitations must be included within the scope of a new search. The new limitations would further require a set of new considerations regarding the prior art.
